Sir Edmond Gin is world's first Bourbon vanilla infused gin. The best vanilla in the world comes from the tropical island of Madagascar and Réunion. It is known as Bourbon vanilla, our main ingredient, which is the second most expensive spice on earth, also known as the "black gold".

Not only does vanilla make my gin change colour, it's also responsible for the unusual, rich, smooth and refined taste. Our main botanical, Bourbon vanilla, lends itself ideally to mix with a wide range of garnishes. The two serves stated above are two of our favourites.

For every bottle sold, there's a contribution to the African Wildlife Foundation.
